

WHAT IS CLAIMED IS:

1. A golf club head comprising a plurality of elastic wire rods arranged in parallel relation along an inner surface of a face plate, said elastic wire rods being extended in contact with the inner surface of said face plate or with a small space formed between the inner surface of said face plate and said elastic wire rods, opposite ends of said elastic wire rods being fixed to a peripheral part of said face plate.
2. A golf club head according to claim 1, wherein the opposite ends of said elastic wire rods are fixedly adhered or welded to a front edge part of a head main body.
3. A golf club head according to claim 1, wherein said elastic wire rods are steel wire rods, carbon wire rods or boron wire rods.
